

uvsim.gui.App.__init__

uvsim.cpu.CPU.resume

uvsim.gui.App.run_until_halt

```
graph LR; A[uvsim.gui.App.__init__] --> C[uvsim.gui.App.run_until_halt]; B[uvsim.cpu.CPU.resume] --> C;
```

The diagram illustrates a flow or dependency where two functions, `uvsim.gui.App.__init__` and `uvsim.cpu.CPU.resume`, both point to a central function, `uvsim.gui.App.run_until_halt`. The arrows indicate that the execution of these two functions leads to or involves the execution of `uvsim.gui.App.run_until_halt`.
